

DRONE FLYOVER

 **DURATION**
20-30 minutes

 **GUEST NOS.**
Unlimited

 **REQUIREMENTS**
Organisation and a high ceiling if indoors – or a calm day if outdoors!

Designed as an icebreaker to get your delegates enthused and interacting from the get-go, Drone Flyover will provide a memorable introduction or finale to your event – with the take-away footage to prove it!

Pre-event, we shall agree with you on a design which could be anything from a company logo to new branding or simply a piece of beautiful artwork – each delegate is then issued with an A2-sized piece of card, each printed with a small section of the entire artwork.

The challenge arises from guests having to arrange themselves in the perfect spot for “the bigger picture” to be formed by holding the printed cards above your head – just one or two people in the wrong position, will scupper the perfect shot.

However once all immaculately arranged, our drone will fly overhead to take both video & still pictures of the spectacular image you have created – which can then be proudly displayed throughout your conference, as well as providing a lasting memento of the image created & shared experience!
